

FIERBINTEANU

tech ride & stage set

Art-pop two piece band performing a vocal-electronic live act. More exactly, two persons on stage singing live, playing midi-controller with laptop and doing choreography with theatrical elements, normally with video projections (handled from the stage). If suitable, the performance involves also guitars and/or bass, played live by one of the band members. Usually, this pop & experimental musical show is approx. 60-70 minutes long, but can be adapted for suitable durations.

Members:

Cristian Fierbinteanu (vocals, laptop, electronics, bass, guitar)

Gabriela Fierbinteanu (vocals)

We bring:

Microphones, effects, instruments, laptop, a mixer and cables to connect all. We have laptop for audio and mixer on stage with us. We also bring a laptop to play video projections (via HDMI connection). The sound is to be taken as a left/right sum from our onstage audio mixer with two DiY and sent in two stage monitors and also in the PA system.

We need:

two stage audio monitors
two mic stands with holders
two guitar stands
two DiYs for the sound to be taken from the onstage mixer
two key stands with top cases (for laptop, midi controller and audio mixer).
one stand/small table or similar for laptop for video projections
four power sources
video projection system with screen, video projector and HDMI cable

We also need one technician to assist us with our installation, sound check and video check (we need 60-70 minutes in total for installing, sound and video-check). After the show, we need assistance from the technician or similar, it should take 20 minutes to take everything out.

We would appreciate:

Cabin with light and mirror backstage, safe and with access to water and clean toilet. Four bottles of still water (ambiance temp.) and four bottles of mineral water (cold) with glasses. Three clean textile towels. If available, coffee and fruits. Good vibes!
